NOTES

Multimedia devices compatibility with MEDIA SYSTEM TOUCH / MEDIA SYSTEM COLOR

Apple® devices

- / Compatibility with Apple devices will depend on which equipped is installed in the car.
- / Some functions, such as Repeat and MIX, might be limited depending on the device used.
- / How well the device functions may also depend on the version of software used.

USB CONSOLE

- / Some slow media devices might temporarily stop working or freeze if they have difficulties functioning.
- / Some media devices might take a long time to read media (due to large volumes, with many files and complex data, lots of folders and sub-folders, unreadable files etc.).
- / The type of media device connected will influence how long it takes media to play. If it takes too long for the file to open (for the content to be read), the following situations may occur:
 1. The multimedia device will not start.
 2. You need to re-select the audio source from the SOURCE menu in order to play the multimedia device.
 3. You need to physically disconnect and connect the multimedia device.
- / Warning: Do not use memory card adapters, USB extension cables or USB hubs.
- / Consult the user guide for information on how to use your MEDIA SYSTEM TOUCH / COLOR, as well as supported audio formats and playlists.

SD CARD SLOT

- / Tests have been carried out verifying the compatibility of micro-SD memories with their corresponding adapters of the same brand.
- / If the micro-SD card does not work with its adapter, check that it has not become worn through use.
- / Consult the user guide for information on how to use your MEDIA SYSTEM TOUCH / COLOR, as well as supported audio formats and playlists.

Multimedia devices compatibility with MEDIA SYSTEM PLUS / NAVI SYSTEM

Apple® devices

- / Compatibility with Apple devices will depend on which equipped is installed in the car.
- / Some functions, such as Repeat and MIX, might be limited depending on the device used.
- / How well the device functions may also depend on the version of software used.

USB CONSOLE

- / Some slow media devices might temporarily stop working or freeze if they have difficulties functioning.
- / Some media devices might take a long time to read media (due to large volumes, with many files and complex data, lots of folders and sub-folders, unreadable files etc.).
- / The type of media device connected will influence how long it takes media to play. If it takes too long for the file to open (for the content to be read), the following situations may occur:
 1. The multimedia device will not start.
 2. You need to physically disconnect and connect the multimedia device.
- / Warning: Do not use memory card adapters, USB extension cables or USB hubs.
- / Consult the user guide for information on how to use your MEDIA SYSTEM PLUS/NAVI SYSTEM, as well as supported audio formats and playlists.

SD CARD SLOT

- / Tests have been carried out verifying the compatibility of micro-SD memories with their corresponding adapters of the same brand.
- / If the micro-SD card does not work with its adapter, check that it has not become worn through use.
- / Consult the user guide for information on how to use your MEDIA SYSTEM PLUS/NAVI SYSTEM, as well as supported audio formats and playlists.

NOTES

Multimedia compatibility with previous systems

Apple® devices

/ New Apple devices have to be disconnected (Lightening connection) along with the Lightening connector adaptor (MD823ZM/A) of the original SEAT IPOD cable. If this is not done correctly, the radio/combi screen showing the song information may become blocked and not respond. Change source or disconnect adaptor.

/ Connections to new Apple models are compatible with the adaptor (MD823ZM/A) or 0.2m adapting cable (MD824ZM/A) of Apple's 30 pin Lightening connector.

/ Find information on audio formats and playlists for your MEDIA IN (CUP / USB port) in the user manual.

/ To manage external storage device, see the manufacturer's instruction manual..

/ Medium / high volume level of the external device is recommended for clear sound via the MEDIA IN (CUP / USB Port).

/ Find information on audio formats and playlists for your MEDIA IN (CUP / USB port) in the user manual.

SD CARD SLOT

/ Consult user manual for usage information, media and audio formats for your SEAT Media System 2.1 browser.

USB CONSOLE

/ Only external storage media or USB mass storage media (Mass Storage Device) 2.0 compliant USB specification.

/ The partition of an external data medium must conform to the FAT16 file system (<2 GB) or FAT32 (> 2 GB) (FAT: File Allocation Table).

/ Some media devices might take a long time to read media (due to large volumes, with many files and complex data, lots of folders and sub-folders, unreadable files etc.). The playback start time is influenced by the connected device. If it exceeds a certain time during the initialization process (read content) it may be necessary to select the audio source via MEDIA menu to play the device.

/ The folder structure on the external storage medium should not exceed a depth of eight levels of folders. A folder should contain no more than 1,000 files.

/ MEDIA IN (CUP / USB Port) offers a standard USB voltage of 5 volts. The maximum intensity is limited to 1000 mA.

/ The use of USB extension cables and USB Hub (USB hub) can cause malfunctions.

/ If an external storage medium is divided into multiple partitions, only the first partition with compatible audio files will be played.

/ Do not use adapters for memory cards, their use may cause errors during operation.
